A Decade of Social Development in Latin America, 1990-1999

The final decade of twentieth century was momentous for Latin America, as it witnessed sweeping changes with regard to previous trends in the region. Most important were the revival of economic growth and the reduction of poverty. Another significant phenomenon was impact of international crises on Latin American countries. This book analyzes what happened between 1990 and 1999 and revisits issues of interest to ECLAC, using the same approach that has characterized the Social Panorama of Latin America. Analysis begins with a look at poverty, income distribution, employment, occupational stratification, the role of education, the intergenerational transmission of opportunities for achieving well-being and the contribution of social spending to the improvement of the population's standard of living and at interrelationships between these dimensions and economic growth. It also uses opinion polls carried out in many of the countries to describe the Latin American population's subjective reactions changes in the 1990s--Publisher's description.

The Quality of Life in Latin American Cities

A growing number of cities around the world have established systems for monitoring the quality of urban

life. Many of those systems combine objective information with subjective opinions and cover a wide variety of topics. This book assesses a method that takes advantage of both types of information and offers criteria to identify and rank the issues of potential importance for urban dwellers. This method which combines the so-called 'hedonic price' and 'life satisfaction' approaches to value public goods was tested in pilot studies in six Latin American cities: Bogot , Buenos Aires, Lima, Medell n, Montevideo, and San Jos of Costa Rica. It provides valuable insights to address key questions such as, Which urban problems have the greatest impact on people s opinions of city management and the most widespread effects on their lives? Do gaps between perception and reality vary from one area of the city to another, especially between high- and low-income neighborhoods? Where can homebuilders most feasibly seek solutions to problems such as inadequate road infrastructure, a lack of recreational areas, or poor safety conditions? Which problems should government authorities address first, in light of their impact on the well-being of various groups of individuals and given private actors abilities to respond? Which homeowners benefit the most from public infrastructure or services? When can or should property taxes be used to finance the provision of certain services or the solution of certain problems? 'The Quality of Life in Latin American Cities: Markets and Perception' proposes a monitoring system that is easy to operate and that entails reasonable costs but also has a solid conceptual basis. Long the ideal of many scholars and practitioners, such a system may soon become a reality and have the potential to make a significant contribution to the decision-making processes in any city concerned with the well-being of its residents.

Understanding and Proving International Sex Crimes

\"[This anthology] addresses the gap betwen international standard-setting prohibiting international sex crimes and actual accountability for individuals who are responsible for such crimes. The book provides detailed analysis of the legal requirements of international sex crimes and types of fact that can be used to meet these requirements. It includes a unique knowledge-base that digests international case law on such crimes. The anthology also contains several studies of institutional and evidentiary challenges in the prosecution of international sex crimes\"--Series pref.

The Politics of the Internet in Third World Development

This book examines the political and developmental implications of the new information and communication technologies (NICT) in the Third World. Whereas the concept of the \"digital divide\" tends to focus on technological and quantitative indicators, this work stresses the crucial role played by the political regime type, the pursued development model and the specific configuration of actors and decision-making dynamics. Two starkly contrasting Third World countries, state-socialist Cuba and the Latin America's \"show-case democracy\" Costa Rica, were chosen for two in-depth empirical country studies.

This book is Pan American Health Organization's latest contribution in the effort to better understand partner

violence and, in so doing, find more effective interventions to right this wrong. The book explores the relationship between alcohol consumption and partner violence gathering information from both the aggressor's and the victim's perspective. It brings to light evidence of alcohol's impact on partner aggression from 10 countries in the Americas (Argentina, Belize, Brazil, Canada, Costa Rica, Mexico, Nicaragua, Peru, Uruguay, and the United States), and represents an unprecedented effort to collect and analyse information from the general population that can be compared across countries. Despite wide differences between countries and cultures, there are common characteristics and trends in the relationship between alcohol and partner violence. This publication will be of interest to the academic and research communities, health promoters, health professionals, communicators, ministries of public health, and the victims of partner aggression.

Critical Medical Anthropology presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

The oak tree was a boon companion as humans expanded their presence across much of the globe. While oak woodlands (Quercus spp.) come today in stunningly diverse forms, the stately dehesas of Spain and the

dramatic oak-dominated ranchlands of California are working landscapes where cultivation and manipulation for a couple of millennia have shaped Mediterranean-type ecosystems into a profoundly modified yet productive environment that is sought-after by every manner of species. The grazing of wildlife and livestock in oak woodlands yields a remarkable plant and animal biodiversity, creating a mosaic of habitats and visually pleasing savannas. Added products unique to Spain such as Iberian pigs and cork, and in California multiple landowner benefits, include valued ecosystem services that allow owners, visitors, and conservation supporters to experience the benefits of woodland life. With its 15 chapters a decade in the making, this handsomely illustrated book covers key topics in oak woodland policy, ecology, and management in Spain and California, presenting new research results and reviewing an existing expert literature.

Is perception reality? Editor Melanie Metzger investigates the cultural perceptions by and of deaf people around the world in Bilingualism and Identity in Deaf Communities. \"All sociocultural groups offer possible solutions to the dilemma that a deaf child presents to the larger group,\" write Claire Ramsey and Jose Antonio Noriega in their essay, \"Ninos Milagrizados: Language Attitudes, Deaf Education, and Miracle Cures in Mexico.\" In this case, Ramsey and Noriega analyze cultural attempts to \"unify\" deaf children with the rest of the community. Other contributors report similar phenomena in deaf communities in New Zealand, Nicaragua, and Spain, paying particular attention to how society's view of deaf people affects how deaf people view themselves. A second theme pervasive in this collection, akin to the questions of perception and identity, is the impact of bilingualism in deaf communities. Peter C. Hauser offers a study of an American child proficient in both ASL and Cued English while Annica Detthow analyzes \"transliteration\" between Spoken Swedish and Swedish Sign Language. Like its predecessors, this sixth volume of the Sociolinguistics in Deaf Communities series distinguishes itself by the depth and diversity of its research, making it a welcome addition to any scholar's library.

Alma Harris The ?eld of school leadership is currently preoccupied with the idea of distributed leadership. Few ideas, it seems, have provoked as much attention, debate and c- troversy. Whatever your position on distributed leadership, and you cannot fail to have one, it is irrefutable that distributed leadership has become the leadership idea of the moment. Yet, it is an idea that can be traced back as far as the mid 20s and possibly earlier. So why the interest? Part of the answer can be found in a move away from theorizing and empirical enquiry focused on the single leader. This shift has undoubtedly been fuelled by structural changes, within schools and across school systems that have resulted in - ternative models or forms of leadership practice. Evidence highlights how those - cupying formal leadership positions are increasingly recognizing the

limitations of existing structural arrangements to secure organizational growth and transformation (Fullan et al. , 2007; Harris et al. , 2008; Chapman et al. , 2008). As a consequence, many heads and principals are actively restructuring, realigning and redesigning leadership practice in their school (Harris, 2008). While the terminology to describe such changes varies, the core principle is one of extending or sharing leadership practice. While scholars have long argued for the need to move beyond those at the top of organizations in order to examine leadership (Barnard, 1968; Katz and Kahn, 1966) until relatively recently, much of the school leadership literature has tended tofocusupontheheadortheprincipal.

The second volume in IOM's series on migrant deaths, Fatal Journeys has two main objectives. First, it provides an update of global trends in migrant fatalities since 2014. Data on the number and profile of dead and missing migrants are presented for different regions of the world, drawing upon the data collected through IOM's Missing Migrants Project. Second, the report examines the challenges facing families and authorities seeking to identify and trace missing migrants. The study compares practices in different parts of the world, and identifies a number of innovative measures that could potentially be replicated elsewhere.
